● Open to full-time or contract roles · remote (UTC-3) or hybrid in Santiago

01 PROFILE

Full stack developer since 2024, focused on agentic systems: I design, build and ship platforms where the model does part of the work and the human keeps the decision. Before that I spent six years in commercial and channel management in the tech sector, which is why I build products that solve business problems, not just technical ones.

02 EXPERIENCE

Sep 2025 – today

Full Stack Developer · Independent · freelance

Client work under service agreements, no direct employment contract.

Cargo Electric Blue SpA

Client since Sep 2025

Full Stack Developer & Product Owner · *Last-mile logistics with an electric fleet*

- Brought the company's operations, analytics, finance and people management into a single platform, automating invoicing and bonus calculations that used to be done by hand in spreadsheets. Used by internal teams (admin and board) and by executives at Cargo's clients.
- Driver bonus engine that replaced the payroll workbook: per truck-day calculation, rate cards with effective dates, and monthly reconciliation against the real payroll sheet.
- Recharts analytics (daily summary, operations dashboard with drill-down and an executive PDF) and rate-card invoicing exported to Excel in the client's format.
- Next.js 16 back office on Firebase/Firestore with role-based access (admin, board and client) on every Server Action: author of 619 of the web app's 632 commits and 102 merged PRs.
- Vitest tests, ESLint taken from 87 errors to 0, and contributions to the drivers' mobile app (Ionic 8, Angular 19 and Capacitor).

Bendita IA · Claude Impact Lab Chile

Apr – Aug 2026

Lead Frontend & AI Agent Developer · *Anthropic's programme in Chile, with Anthropic as Technical Partner*

- Platform that ran both verticals of the programme, Fintech and Longevity: 1,656 applications, 100 competing teams and 3,277 evaluations recorded.
- Evaluator portal integrated with Claude agents (Haiku and Sonnet 4.5) that pre-score 10 sub-checks per team with evidence; the final call stays with the human evaluator.
- Live leaderboard on Supabase Realtime and awards ceremonies in front of 250 and ~200 attendees.
- Rubric engine configurable without a deploy, per-vertical multi-tenant abstraction, and a certificate engine with public verification.
- 166 commits in a repo with ~970 test cases: Vitest, Playwright E2E and guardrail suites for the agents.

NEXT.JS 14 · TYPESCRIPT · SUPABASE · CLAUDE API · ANTHROPIC SDK · VITEST · PLAYWRIGHT

Portokali Café

Mar – Sep 2026

Lead developer, with Poweredra · *Specialty café in Vitacura*

- Migration from WordPress to Next.js 15 with an MVP in production in seven days, starting from a React prototype.
- Forms stored in Supabase with Resend notifications and Toteat and Justo integrations; a later audit caught a form silently losing job applications for five months.

NEXT.JS 15 · TYPESCRIPT · SUPABASE · RESEND · GITHUB ACTIONS

Nov 2024 – Aug 2025	AI Research Contributor · Outlier ▪ Direct evaluation of GPT-4, Claude and Gemini models for enterprise use cases. ▪ Benchmarking methodologies and quality standards for prompt engineering, with international teams.
May – Dec 2024	Full Stack Developer & QA · Vemex Digital ▪ Web applications with React and Next.js to enterprise quality standards. ▪ Testing strategy and performance optimisation.
2017 – 2023	Commercial & channel management · Hikvision · Dahua · SSTT · Orama · Wetland ▪ Six years managing national sub-distributor networks in the tech sector. ▪ Public tenders (Mercado Público) and implementation projects with multiple stakeholders.

03 PROJECTS

Nov 2025 – today	Curiana Radio curiana-radio.vercel.app <i>Personal project · ongoing research</i> Cultural publication and simulation lab: 60 LLM agents speak Caquetío, an Arawakan language reconstructed through the comparative method. Controlled experiment (2.7× more convergence than the control), 269 engine tests and 9 executable invariants. NEXT.JS 16 · PYTHON · CLAUDE HAIKU 4.5 · SUPABASE · VERCEL BLOB
Jan 2026	Multi-agent medical chatbot <i>Capstone · Generative AI diploma, U. de Chile</i> Multi-agent architecture with LangGraph, external API integration, PostgreSQL state and RAG over medical documentation, deployed with Docker and LangServe. LANGCHAIN · LANGGRAPH · RAG · POSTGRESQL · DOCKER

04 STACK AND SKILLS

AI AND AGENTS	Claude API · Anthropic SDK · tool use · AI-assisted evaluation · LangChain · LangGraph · RAG · Claude Code	FRONTEND	Next.js 14–16 · React 18/19 · TypeScript · Tailwind CSS · Angular 19 · Ionic 8
DATA AND BACKEND	Supabase / PostgreSQL · Firebase / Firestore · Node.js · Python · REST APIs	QUALITY AND DELIVERY	Vitest · Playwright · GitHub Actions · Vercel · Docker · Git
PRODUCT	Product ownership · Scrum · stakeholder management · public tenders	LANGUAGES	Spanish (native) · English: fluent, spoken and written (C1)

05 EDUCATION

Oct 2025 – Jan 2026	Diploma in Generative AI in Organizations · Universidad de Chile, FEN
Jun – Jul 2025	Prompt Engineering and Generative AI · The Prompt Academy
Oct 2022 – Jul 2024	Certified Web Developer · Digital House Coding School
Jul 2023	Scrum Master Professional Certificate · Certiprof
2009 – 2014	Environmental Engineer · Universidad de Falcón, Venezuela · Honourable mention for the thesis.
